

JMH Capital Overview:

JMH Capital is a private equity fund based outside of Boston. We invest in growth-oriented companies with revenues of up to \$200 million and sound business strategies. We seek to partner with entrepreneurial management teams to pursue management buyouts, leveraged buyouts and recapitalizations. We target businesses that demonstrate a compelling value proposition. These companies generally rely upon proven technologies, focus on a single business or product line, and have sound market strategies. This focus reduces or eliminates many typical investment risks – technological, strategic, managerial – inherent in investing in more complex companies.

JMH Capital differentiates itself from traditional private-equity groups by the considerable senior-level operating experience of its partners. Our team brings an extensive array of complementary investing skills – exceptional commercial, operational, and financial due-diligence experience; sophisticated transaction structuring and financing know-how; rapid post-acquisition value enhancement, and creative disposition strategies.

JMH Capital is currently accepting resumes for the position of ASSOCIATE.

Responsibilities:

- Assist senior executives with screening, structuring and processing of investment opportunities
- Conduct in depth business, financial and industry due diligence
- Develop financial models and valuation analysis
- Provide deal execution support and post-investment transaction monitoring
- Communicate effectively with senior leadership within the firm and portfolio company management

Candidate Profile:

- Two to three years in investment banking, cash flow/mezzanine lending or strategic consulting
- Solid academic record
- Strong analytical and modeling skills
- M&A and Leveraged Finance experience
- Familiarity with structuring and execution issues in leveraged buyouts and other private equity transactions
- Strong oral and written communication skills
- Self-starter and independent thinker with strong problem solving skills
